And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in His Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid :

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm, by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm ; yet, nevertheless, it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert His Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow :

Open General Licence for export of List "C" goods to Norway, Sweden, Denmark, Holland and Switzerland.

An Open General Licence has been issued allowing goods on Section "C" of the Prohibited List, including those shown in Appendix No. 1 (page 1161), but not including any good contained in Section "D" (page 1161), to be exported freely by freight from this country to Norway, Sweden, Denmark, Holland and Switzerland, on the following terms:—

NORWAY AND SWEDEN.—Individual guarantees in respect of exports are no longer required, but the goods must be consigned to the appropriate import associations. In order that the method of consignment may be checked, an arrangement has been made whereby shippers are to forward the Customs Shipping Bills to the Export Licence Department, 4, Central Buildings, Westminster, S. W. 1 (in envelopes marked "Shipping Section"), for approval. The Shipping Bills will be amended, if necessary, and returned to the shippers stamped "approved." Upon the production of approved Shipping Bills shipment will be allowed by H. M. Customs without any form of guarantee, subject to the usual Customs formalities. This procedure will not apply to any licences which have already been issued or which may hereafter be issued in special cases.

DENMARK.—The usual guarantees must be produced to the Customs at the time of shipment. The guarantees need not be produced to the Customs in any case where individual licences have been or may be issued in special cases.

HOLLAND.—All goods may be consigned to the Netherlands Oversea Trust for account of the sub-consignee, without the prior production of an N. O. T. certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

SWITZERLAND.—All consignable goods may be consigned to the Société Suisse de Surveillance Economique for account of the sub-consignee without prior production of any form of certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

In cases where the associations specified above refuse generally or specifically to accept consignment and exporters make a declaration to the Customs to this effect, goods may be consigned to the Inter-Allied Trade Committees in Christiania, Stockholm, Copenhagen or The Hague, on account of the sub-consignee. In the case of Switzerland, consignment of such goods should be made to the British Legation at Berne. The local Inter-Allied Trade Committees (or the British Legation as the case may be) will endorse the Bills of Lading (without any financial liability) on receipt of satisfactory guarantees from the consignee.

Further information will be given as soon as it is known which of the above-mentioned organisations are prepared to accept consignment. Meantime, consignors should get into touch with consignees in respect of goods which will be ready for shipment in the next few weeks, with a view to ascertaining whether the appropriate association will accept consignment or not.

SAMPLES.

An open general licence has been issued which permits the free export of all *bona fide* samples of prohibited goods to all non-enemy destinations, and to enemy territory with which trade is now permitted (*see page 1160*). Samples exported under this licence may be used only for genuine sample purposes, *i.e.*, for obtaining orders from foreign buyers, and may not be sold except with the written consent of the Export Licence Department, but such consent may be dispensed with when it is desired to sell the articles in the country of destination after they have fulfilled their purpose as samples. Exporters will be required to satisfy the Customs Authorities that the goods presented for export under this licence are *bona fide* samples, and to make a declaration to that effect on the relative shipping documents.

URGENT ORDERS.

The Board of Trade, Export Licence Department, announces that, in collaboration with the Department of Overseas Trade, an arrangement has been made whereby firms receiving orders which require immediate acceptance may telegraph details of any such order to the

Department of Overseas Trade in order to ascertain whether a licence will be granted for the export of the goods if the order is accepted.

In the event of an applicant being promised a licence he will be enabled to deal with the order straightway with the knowledge that upon application being made in the proper form to the Export Licence Department the Licence will be granted.

The telegrams should be addressed to "Orders, c/o Advantage, Stock, London." They should give in each case in addition to the name and postal or telegraphic address of the applicant the quantity and description of the goods comprised in the order and the name and address of the ultimate consignee if the goods are destined for a neutral country. In the case of orders from Allied or British Territory or from Territory in the occupation of troops of the Associated Governments, the consignee need not be stated; and it will be sufficient merely to give the country of destination. A reply of 24 words (1/3) must be prepaid.

Applicants are requested in their own interest to confine their enquiries to orders needing a very urgent decision, since the fewer the enquiries the more promptly can answers be given.

Any subsequent correspondence that is necessary in connection with the telegraphic enquiries should be addressed to the Comptroller General, Department of Overseas Trade (Export Facilities Section), 73, Basinghall Street, E.C. 3.

IV.—General.

14. (a) In the event of goods requiring to be loaded or unloaded by owners becoming liable to both demurrage and wharfage charges, the Railway Administration may levy both demurrage and wharfage charges for such periods as the goods would be liable to such charges under these rules.

(c) Sundays, Christmas Day and Good Friday will be reckoned in charging demurrage on all wagons made available for unloading on those days and stations will also be opened for unloading of wagons on those days so that merchants receiving wagons to their addresses which they are required to unload may do so.

This does not apply in the case of wharfage in which connection the above days will be treated as *dies non* as hitherto.

(d) Explosives or dangerous goods must be removed by the consignee from the receiving station during the 12 hours of day-light after arrival; if this condition is not strictly complied with, the Railway Administration may return the consignment to the consignor at his risk and expense.

He was in command of his section of sappers making a gun road across "No Man's Land" and the enemy trench system, under enemy shell fire, and carried out his work so efficiently that the road kept pace with the advancing infantry and the artillery were able to advance immediately the infantry reached their objective. He has displayed ability and power of command on other occasions.

Throughout the advance he was particularly noticeable for his dash and courage and set a fine example to his men. His party came under heavy machine gun fire causing casualties, but he set a most praiseworthy example of coolness, inspiring courage in his men, and continued to advance. He has several times previously displayed wonderful courage and disregard of his personal safety, particularly on the night of 28th-29th May 1918, when he was with a wiring party. For conspicuous gallantry on the 19th September 1918, in pushing forward his Lewis gun under heavy machine gun fire and opening fire on an enemy machine gun, with the result that it was silenced, and the forward advance greatly helped. The non-commissioned officer in charge of the gun was killed during the action, and this man worked the gun on his own initiative, making accurate shooting in spite of the fact that he was under heavy fire all the time.

No. 4254 Havildar Shankar Singh, 26th Punjabis.

For conspicuous gallantry during the operations of September and October 1918, particularly on the 19th September 1918, when in command of a platoon which was held up by formidable enemy wire. He sprang forward and threw

himself on the wire, breaking down the posts and tearing down the wire. His platoon fired by his magnificent example was first through the wire. He continued throughout the day to show the same spirit in leading his men to attack formidable lines of trenches.

Subadar Mehar Singh, 47th Sikhs.

For conspicuous gallantry and devotion to duty in the operations on the 19th and 20th September 1918. By his fine example of personal gallantry under fire, and skilful handling of his company, he greatly contributed to the success of the operations. On the 20th September he collected a few men at a critical time and rushed an enemy automatic rifle which was enfilading the advance of the rest of the company.

No. 2079 Lance-Naik Lal Ghuncha, 51st Sikhs (Frontier Force).

For conspicuous gallantry and devotion to duty throughout the recent operations. During an attack on the 10th September 1918, this young non-commissioned officer was foremost in the advance cheering on his companions and setting a fine example to all ranks. He is always the first to volunteer for any dangerous duty and has many times distinguished himself.

Jemadar Muhammad Khan, 53rd Sikhs (Frontier Force).

For conspicuous gallantry and devotion to duty throughout the whole of the recent operations. He also did particularly well whilst in command of two sections during a raid on the enemy's trenches on the night of 27th-28th July 1918, when after penetrating the enemy's wire he himself rushed to the front and captured five of the enemy. Subsequently he displayed great coolness and initiative in assembling the prisoners and wounded, and conducting them through the enemy's position regardless of the fire.

No. 3933 Lance Naik Darel Singh, 53rd Sikhs (Frontier Force).

For conspicuous gallantry and initiative on the night of the 6th-7th May 1918, when he accompanied a patrol of two platoons which was surprised by a large body of the enemy and came under fire of rifles and machine guns at close range. He has previously done excellent work, and obtained accurate and valuable information.

No. 252 Sepoy Ali Shah, 53rd Sikhs (Frontier Force).

For conspicuous gallantry in action on the 19th September 1918. His platoon had advanced to reinforce the advanced guard and came under heavy and close fire of machine guns from a concealed position, all men of the leading wave being hit, except himself and one non-commissioned officer. He could have easily withdrawn to cover but remained and continued to fire steadily with a Lewis gun until his drums were expended, and then waited until reinforcements of another platoon came up and went forward with them. This sepoy has always done consistently well.

No. 1761 Colour Havildar Gul Amir, 56th Punjabi Rifles (Frontier Force).

For gallantry and devotion to duty especially during the fighting on the 19th and 20th September 1918. During the attack on the 19th September 1918 he showed resource and initiative in the way he handled his platoon, pushing forward with great determination in spite of heavy hostile machine gun and rifle fire.

Subadar Laximan Jankar, 107th Pioneers, attached 121st Pioneers.

For conspicuous gallantry and devotion to duty on the night of the 8th-9th June 1918, when in command of wiring parties. His party was subjected to persistent sniping and machine gun fire and they came into an artillery barrage in spite of which he kept his men together and carried out his portion of the work where others failed.

Jemadar Sheobaksh Singh, 125th Napier's Rifles.

For conspicuous gallantry and devotion to duty, on the 20th September 1918, when his company was heavily engaged by enemy machine guns, he displayed great energy in getting his Lewis guns into action and, in spite of the heavy machine gun fire, moved continuously up and down the line visiting the guns. By his great coolness and utter disregard for personal safety this officer set a fine example to all ranks.

Subadar Karam Dad, 2nd Battalion, 151st Indian Infantry.

For conspicuous gallantry on the 20th September 1918, when being the only Indian officer left unwounded with his company he personally led forward his own and other platoons to two positions, under heavy machine gun and rifle fire, notwithstanding very heavy casualties which included his brother who was killed. His fearless leading gave a splendid example to the company.

No. 906 Havildar Wasakha Singh, 1st Battalion, 152nd Punjabie.

For conspicuous gallantry during the operations of September and October 1918, particularly on the 19th September 1918, during an attack when his company commander fell wounded in the open, this non-commissioned officer with another man at once advanced from a captured enemy position to bring the officer into cover under heavy machine gun fire. Whilst doing so the other man was severely wounded, but Havildar Wasakha Singh succeeded in bringing the officer safely under cover. He showed complete disregard of personal danger.

Subadar (Acting Subadar-Major) Arjun Sing Thapa, 2nd Battalion, 3rd Queen Alexandra's Own Gurkha Rifles.

For conspicuous gallantry and devotion to duty on the 10th April 1918 when he commanded the company after his British officer had been killed and during the subsequent withdrawal was responsible for bringing back, in good order, the greater part of his company, and for collecting many wounded.

No. 3303 Havildar Purney Ghale, 1st Battalion, 8th Gurkha Rifles.

For conspicuous gallantry and devotion to duty on several occasions. Whether under shell fire in the trenches, or leading a dangerous patrol, he has always been a shining example of fortitude, resource, and the aggressive spirit.

• No. 540 Sepoy Sarban, 1st Kashmir Imperial Service Infantry.

For conspicuous gallantry and devotion to duty. On the night of the 26th-27th July 1918, during the withdrawal of his small patrol before a superior and enterprising enemy, he particularly distinguished himself, when he returned to the assistance of a wounded man. He alternately bandaged the wounded man and kept up a fire, thereby keeping the enemy at bay. Under fire he carried the wounded man and his rifle over very difficult ground in the darkness until extricated by his patrol. This gallant action resulted in the saving of the wounded man's life.

NOTICE.

INDIAN POLICE FORCE.

The Secretary of State for India in Council has decided not to hold any competitive examination, during the years 1919 and 1920, for admission into the Indian (Imperial) Police Service, but to make appointments by nomination as described below from among gentlemen who have rendered military service during the war.

2. *Conditions of eligibility.*

Selection will be confined to candidates who have rendered military service during the period of hostilities. Every candidate must also be a British subject of European descent, and at the time of his birth his father must have been a British subject, either natural born or naturalized in the United Kingdom. In cases of doubt whether a candidate satisfies these conditions, the decision of the Secretary of State for India in Council, and, where nomination is made in India, that of the Government of India, will be final. Candidates must have been born on or after the 2nd June 1894 and on or before the 1st August 1900, and must be unmarried. They must be certified by their Commanding Officers to be of good moral character and physically fit for service in India. They must have been educated up to a reasonable standard such as is normally required for Sandhurst and it may further be necessary to subject them to a qualifying educational test. A percentage of vacancies will probably be filled by appointment in India.

3. *Medical examination.*

Selected candidates will be required to undergo an examination by a medical board as to their physique and capacity for active out-door work in the plains of India. Instructions as to the date and time of this examination will be issued in due course.

4. *Riding tests.*

Those who have passed the medical examination and satisfy the other requisite conditions will be appointed as probationers. They will then be examined as to their ability to ride, and will be required as hitherto to obtain before appointment—

(a) a certificate that they are able to ride well and perform journeys on horse back, or

(b) a certificate of minimum proficiency in riding.

In the latter case they will be subjected after appointment to such further test in riding as may be prescribed by their Government, and will not be appointed Assistant Superintendents of Police until they shall have passed such tests to the satisfaction of their Governments.

5. Allotment to Provinces.

Selected candidates who have successfully passed the above mentioned tests will be allotted, as probationers, to one or other province on a consideration of all the circumstances, including their own wishes; but the requirements of the public service will rank before every other consideration. The allotment will also be subject to the right of the Government of India to make transfers between provinces if necessary.

6. Uniform, etc.

It is an ordinary condition of appointment to the Police Department that a probationer should provide himself with—

(a) either a uniform or the cost of it, and

(b) not less than £50 for the purchase of a horse and saddlery in India.

7. Free passages to India will be provided for candidates who are appointed in England, but any probationer resigning his appointment within three years on any ground but that of health, supported by a medical certificate, will be required to refund the cost of his passage.

8. Salary.

His Majesty's Secretary of State for India has been pleased to sanction revised rates of pay for officers of the Imperial Police of the rank of Deputy Inspector-General and downwards with effect from the 1st January 1919. From that date onward there will be two scales of pay, a senior and a junior. Officers will draw pay in the senior or the junior scale according as they are holding superior appointments (*i.e.*, Superintendents of Police and upwards) or not. The scales will be as follows:—

Years of Service.				Junior scale. Rs. per mensem.	Senior scale. Rs. per mensem.
1st 350	...
2nd 400	...

10th 650	800

22nd	1,300
23rd	1,350
24th	1,350
25th and over	1,400

(a) *Efficiency bar*.—An officer who is not considered fit for a superior appointment will not be allowed to rise above Rs. 600 in the junior scale.

(b) *Efficiency bar*.—An officer who is not considered fit to hold charge of a first class district will not be allowed to rise above Rs. 1,200.

The scale for Deputy Inspectors-General of Police commences at Rs. 1,600 a month, and rises to Rs. 2,000 by annual increments of Rs. 100.

Officers at present entitled to exchange compensation allowance will retain this right to draw the allowance whenever the rate of exchange renders it admissible again in the future.

9. Period of probation.

Probationers will be required to qualify by passing the necessary departmental examinations (as well as the riding test if necessary, *vide* rule 4) within two years of their arrival in India or date of appointment if nominated in India.

10. Liability of probationers to removal.

Any probationer who may fail to pass the prescribed examinations within two years, or be found unfit for police duty, will be liable to removal from the service. Any probationer so removed from the service will be furnished with a free passage to England, provided he utilizes such passage within three months from the date of such removal.

11. Promotion after probation.

No probationer will be eligible for promotion, either acting or substantive, until he has passed the prescribed departmental examinations including the riding test.

12. Leave, pension, and provident fund.

Officers joining the Indian Police under these conditions will be eligible for leave and other concessions in accordance with the provisions of the Civil Service Regulations and other regulations which may be issued from time to time.

13. Articles of agreement.

Probationers will be required to sign articles of agreement, describing the terms and conditions of their appointment before the appointment is made.

GOD SAVE THE KING.**INSURANCE.****No. 4038.***The 9th June, 1919.***RESOLUTION**—By the Government of India, Department of Commerce and Industry.

In view of the results disclosed by the actuarial valuation of the assets and liabilities of the Post Office Insurance Fund as at 31st March 1912, the Government of India announced, in the Resolution from this Department No. 4016-4050-91, dated the 22nd May 1914, the grant of a bonus to the policyholders. A further valuation of the Fund as at 31st March 1917 has again shown a substantial surplus so as to permit of the distribution of a considerable portion thereof without upsetting the financial stability of the Fund. The Governor-General in Council is accordingly pleased to grant to the holders of policies in force on 31st March 1917, a reversionary bonus as an addition to and payable with the sum assured, at the rate of 1½ per cent thereon in the case of Whole Life Assurances, secured by premiums payable throughout life or for a limited period, or under which no further premiums are payable, and 1 per cent in the case of Endowment Assurances for each full year the respective policies were in force between 1st April 1912 and 31st March 1917. This bonus will be allowed in the case of policies now in force and of all claims which have arisen either by death or survivance since 31st March 1917 under policies in force on that date, but not to policies surrendered before the date of this Resolution. In the case of transferred or reduced policies,

bonus will be allotted to the respective policies as they existed on 31st March 1917. In addition to the above mentioned bonus, an *interim* bonus at two-thirds of the above rates will be allowed in the case of Whole Life and Endowment Assurance policies which become claims by death between 1st April 1917 and 31st March 1922 for each full year they were in force during that period. An *interim* bonus at the rate of 1 per cent will be allowed in the case of Endowment Assurance policies which become claims by survivance between 1st April 1917 and 31st March 1922 for each full year they were in force during that period. The *interim* bonus will be based on the amount of the sum assured at date of death or survivance. No fraction of a rupee will be payable as bonus.

The Governor-General in Council is also pleased to direct that under Limited Payment and Endowment Assurance policies the maximum number of monthly premiums payable after this date will be 12 times the difference between the office age at entry and the age at which the premiums are to cease.

Ordered, that this Resolution be communicated to the several Departments of the Government of India, to all Local Governments and Administrations, to all Heads of Departments subordinate to this Department, and to the Accountant-General, Posts and Telegraphs.

Ordered, also, that a copy be forwarded to the Director-General of Posts and Telegraphs for necessary action.

Ordered, further, that the Resolution be published in the Gazette of India.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th June 1919. based on the Indian Daily Weather Reports of the period.

1. The Arabian Sea monsoon was rather weak on the 5th, but on the succeeding day it strengthened considerably and extended into the central parts of the country. From the 8th it weakened again and rainfall due to it was confined during the rest of the week mainly to the west coast of the Peninsula and the Central Provinces. The storm in the Bay which lay off the north Madras coast on the 5th moved in a northeasterly direction and dissipated itself during the 6th over the head of the Bay; during its continuance rain was restricted to Burma, Orissa and lower Bengal, but on its disappearance the monsoon extended to Assam, Bihar and the southeast of the United Provinces. The Bay monsoon was fairly strong throughout the week. On the 9th, however, a depression formed over Rangoon, which was instrumental in limiting the rainfall due to this current to northeast India and Burma.

2. *Burma*.—Nearly general rain fell in Lower Burma daily; in Upper Burma rainfall was nearly general on the 5th and local on four other days.

Northeast India, including Orissa.—Rainfall was nearly general throughout the week in Orissa, between the 6th and 11th in Chota Nagpur, on the 5th and 6th and again between 8th and 11th in lower Bengal, and between 8th and 11th in upper Bengal, Bihar and Assam. Local rain fell in Assam, lower Bengal and Bihar on one other day.

The United Provinces, Central India and the Central Provinces.—Nearly general rain fell in Central India West on the 8th, in Barar on the 7th and 8th, in the Central Provinces West on the 10th and in the Central Provinces East on the 9th and 10th, while local falls occurred in the first named sub-division on two other days and in the two last named sub-divisions on two and three other days respectively. Over the rest of the division there was no general rain during the week, but local rain fell in Central India East on the 9th and 11th, in the east of the United Provinces on the 8th and 9th and in the west of the United Provinces on the 7th; a few falls occurred on three other days in the west of the United Provinces and on one other day in the east of the United Provinces.

Northwest India.—A few scattered falls of rain occurred during the week in the Punjab, Kashmir, east Rajputana and Gujarat.

The Peninsula.—Rainfall was nearly general throughout the week on the west coast, between the 6th and 8th in the Bombay Deccan, on the 6th and 7th in north Hyderabad, on the 7th in south Hyderabad, on the 5th and 6th in Mysore and on the 8th on the north Madras coast. There was local rain on one other day in the Bombay Deccan and south Hyderabad, and on three other days on the north Madras coast. In southeast Madras and the Madras Deccan rain was limited to a few scattered falls.

Season and Crop Prospects for the week ending Saturday,
7th June 1919.

Burma.—During the week good rain fell throughout the Province. Ploughing of main crop is general. Reaping of spring rice is completed in Upper Burma. The condition of standing crops is good. The health of cattle is generally good. The price of unhusked rice in Rangoon is stationary at rupees 180 per hundred baskets and is much above normal. The market for white rice rose to Rs. 385 per hundred baskets for specials.

Assam.—The weather during the week was generally seasonable but more rain is wanted in both valleys for ploughing and growth of crops. Sowing of autumn rice and jute and planting of sugarcane are approaching completion. Plucking of tea and ploughing for and sowing of winter rice continue. Prospects of crops are generally not satisfactory. Cattle disease is reported from five districts. The price of common rice continues to rise but more slowly.

Bengal.—During the week light to moderate rain was general and beneficial for standing crops. More rain is needed for agricultural operations. Weeding of autumn crops continues in some districts. Preparation of land for winter rice is progressing favourably. The average price of common rice for province has risen by 23 per cent. The average number of persons engaged daily on test works in Brahmanbaria was 1,387.

Special report from Bankura for week ending 7th June is as follows:—Rain-fall during the week was general and is improving the condition of paddy seedlings. Fiftyone works are open. Gratuitous relief in cash doles is given in 8 unions. Numbers relieved on works on the last day of the week was 8,388. Gratuitous relief by cash doles 13,306, paddy husking advances 2,804, weavers 639, better class poor 492, total 17,331, grand total 25,669. The increase in numbers on works is due to the spreading of distress, return of emigrants and transfer of fit persons on gratuitous relief to work. The increase in numbers on gratuitous relief is due to the opening of new centres and acuteness of distress. Private works and agricultural operations are giving some employment. Numbers relieved by five Charitable Societies:—Rice doles 2,212, cloth 28, total 2,240. Distress is spreading. Crime is normal. The physical condition of workers and the public health are satisfactory. Fodder and water are adequate. Cloth is being distributed to destitutes. Loans are being advanced. The demand for agricultural loans is general. Relief measures are adequate. The price of common rice is stationary, it varies from 5 to 5½ seers per rupee. One thousand maunds of Burma rice have been imported by district board and is being sold at 6 seers per rupee.

Bihar and Orissa.—During the week rain was general over the Province. The fall was heavy in Ranchi and Balasore and generally moderate in the remaining districts of Orissa and Chota Nagpur, and it was mostly light in Bihar. The rain has facilitated the preparation of land and benefited the standing crops but more rain is wanted in parts of Bihar. Standing crops on the whole are doing well. The daily average number of persons attending test works was:—39 in Gaya, 8,259 in Bhagalpur, 1,610 in Angul, 565 in Puri, 52 in Ranchi and 2,169 in Manbhum. The attendance on relief works in Angul was:—2,927. Gratuitous relief was given to 3,095 persons in Bhagalpur, 6,714 in Angul and 197 in Cuttack. GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

MEMORANDUM REGARDING THE PROBABLE AMOUNT OF
MONSOON RAINFALL IN 1919.

Monsoon rainfall in India is affected by previous conditions over various parts of the earth. The recent data which appear to be of importance are :—

SOUTH AMERICA.

2. *Argentine Republic*.—Pressure was in excess by 1·8 mm. in March, and in defect by 2·1 mm. in April.

Chili.—Pressure at Santiago was in defect by 0·5 mm. in April and 1·2 mm. in May.

THE INDIAN OCEAN.

3. (a) *Mauritius*.—Pressure in May was well below normal from the 4th to the 17th, and in moderate to large excess during the rest of the month. On the whole there was an excess of '014".

(b) *Zanzibar*.—Rainfall for April was 8·85", against a normal of 14·26": for May it was 2", the normal being 10". Winds were nearly normal as regards direction, but their velocity was high.

(c) *Seychelles*.—The southeast trades appeared in the middle of the second week in May, about three weeks after the average date, but were stronger than usual. The total rainfall of the month amounted to 14·3" or 145 per cent in excess.

(d) *Logs of vessels*.—According to the scanty information available for the western half of the equatorial belt there was a delay of about a fortnight in the setting in of the southeast trades over the region to the east of the meridian of 49°. In the Arabian Sea and the Bay of Bengal away from the coasts light irregular winds prevailed during the first half of May.

SNOWFALL.

4. (a) In Persia the total precipitation of the period November to May was appreciably below normal except in the region around Meshed where it was about 20 per cent in excess owing chiefly to frequent falls in May.

(b) In Baluchistan the precipitation was in decided excess in December and May and in marked defect in November and from January to April.

(c) During the period November to March for which alone information is available the snowfall appears to have been much heavier than usual on the ranges around and to the north of Kabul.

(d) In the Frontier Province the snowfall was heavier than usual in parts of the Karama hills during the greater part of the winter: in the Kagan valley it was reported to have come down as low as 4,000 feet. In the north Waziristan the fall was apparently light, while in the south Waziristan it was somewhat in excess. In Drosh the snowfall appears to have been very heavy from December to March, and very light in April. More snow fell on the hills adjacent to Parachinar than at this time last year.

(e) In Kashmir the snowfall was nearly normal in November, February and March, in large excess in December and January, and lighter than usual in April. In May there were only a few light local falls. In Ladak and the

regions to the north there was on the whole considerably less than the usual amount and the traffic with Yarkand was in consequence open through nearly the whole season.

(f) In Chamba there were very heavy falls in December, January and April, and the accumulations at the present time are not only well above the average but cover a larger area than usual. All the high passes are still closed. In the Kulu hills the winter was unusually severe and prolonged, and snow fell heavily and down to very low levels. In the opinion of the Assistant Commissioner the snowfall was much heavier than has occurred for many years. Towards the end of May large snow drifts existed in shady places down to 10,000 feet, and above 12,000 feet there was an unbroken sheet of snow everywhere. On the ranges near Kilba the snowfall was very much above the average owing chiefly to excessive falls in January and February and perhaps also in May. The existing accumulations there are twice or thrice the normal amount. In the region around Poo there was a great deal of snow between November and the first week of February; no information is available for the subsequent period. Practically no information is available from the Murree hills.

(g) The snowfall in Garhwal was exceptionally heavy with the result that the quantity lying there at the present time is materially greater than usual. In the Almora Hills the fall was well above normal in January and April and slightly above in May, while it was normal or in defect in the rest of the season. The accumulations on May 23rd were on the whole of about the average depth on the higher passes and somewhat in excess on the middle heights.

(h) Snowfall was on the whole lighter than usual in the Balipara and Sadiya Frontier Tracts as well as on the ranges bordering on north Lakhimpur and the Kamrup district.

On the whole it may be said that over nearly the whole area from Hazara to Garhwal the snowfall was unusually heavy and prolonged, and occurred to unusually low levels. The accumulations existing there at the present time are in consequence not only abnormally deep but also extend to much lower levels than usual. The information about Kashmir and the regions beyond Hazara is rather scanty but appears to indicate fairly normal conditions. This inference is corroborated by the fact that temperature in May differed to no important extent from the average in Kashmir and the North-West Frontier Province. In the eastern Himalayas the snowfall appears to have been below normal.

INDIA.

5. The chief features of the weather in May were:—

- (a) the advance from the west of no less than five disturbances of the cold weather type into north-west India where in ordinary years such disturbances seldom occur in May,
- (b) the delay in the full development of the cold weather conditions in northern India and the consequent scantiness of rainfall in Burma and northeast India,
- (c) the appearance of the monsoon on about the average date in the west of the Peninsula and about a week before the usual time in the Bay,
- (d) the occurrence of heavier rain than usual in the Peninsula chiefly due to hot weather conditions, and
- (e) the excess of barometric pressure amounting to .021 on the average of the whole Indian area.

INFERENCES FROM THE DATA.

6. The factors which have been found by statistical methods to be most favourable for the monsoon are—

- (a) high pressure in South America during March to May,

(b) low pressure at Mauritius during May,

(c) small accumulations of snow in the Himalayas at the end of May,

(d) defect of rainfall at Zanzibar during April and May.

7. (a) Unfortunately owing to cable delays information regarding the mean pressure in the Argentine during May has not yet arrived; but it is clear from the data already received that South American pressure is in defect, although to what extent is uncertain. This is unfavourable for the monsoon.

(b) The mean pressure during May at Mauritius was in moderate excess, this is also unfavourable.

(c) The accumulations of snow are unusually large over extensive regions of the western Himalayas, and therefore snow is also likely to have a prejudicial effect on the monsoon, chiefly during the first two months.

(d) The rainfall at Zanzibar was largely in defect during April and May, this is favourable to the monsoon; but unfortunately this factor has a much smaller influence than the other three.

Thus of the four factors considered three are unfavourable and only one favourable. This would lead to the conclusion that the rainfall of the whole period is more likely to be in defect than in excess, but none of the factors indicate that the defect will be large.

8. The remaining factors for which data are given above do not help in estimating the total rainfall of the monsoon, but are useful in determining its character during the initial stage.

The presence of cold weather disturbances in India so late as May, the heavy rain in Seychelles, the high pressure in India during May and the delay in the establishment of the southeast trades in the equatorial regions, are all conditions which might be expected, in addition to the large accumulations of snow, to retard the setting in of the monsoon. On the other hand the monsoon actually appeared near to the normal date on the west coast and early in the Bay. The manner in which the monsoon appeared this year however has been very abnormal. Monsoon rainfall occurred in Rajputana almost at the same time as on the Malabar coast, and up to the present the monsoon rain has been accompanied by northerly instead of westerly winds along the whole of the west coast of the Peninsula. In the Bay a storm formed but disappeared at the head of the Bay without crossing inland. These facts also indicate that conditions are not at present favourable for a strong monsoon and point to the temporary nature of the present advance.

SUMMARY.

(a) The monsoon rainfall over India as a whole is likely to be below normal, but there is nothing to indicate a large defect.

(b) The monsoon will probably be unsteady during June and July.

4. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India application should be made to the patent offices in the countries concerned.

5. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission for which due allowance should be made. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

6. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. COTTON PRESS RETURN.

No. 16 of 1918-19.

PREFATORY NOTE.

THE COTTON SEASON, 1918-19.

In the Final Cotton Forecast, published on the 19th February, 1919, the yield of the crop of 1918-19 was estimated at 3,671,000 bales on an area of 10,497,000 acres, as compared with 4,000,000* bales on an area of 25,188,000 acres, the final estimates of the preceding year, a decrease of 8 per cent in the outturn. There were 1,358,000 bales of cotton pressed in the pressing factories, and 331,000 bales of unpressed cotton received in the spinning mills, from 1st September, 1918, to 30th April, 1919, as against 1,078,000 bales and 171,000 bales, respectively, during the corresponding period of last year, showing an increase of 26 per cent in the case of presses, but a decrease of 11 per cent in the case of mills. Too much stress should not be laid on the accuracy of these returns as a means of checking the forecast estimates of outturn, as there is at present no system in vogue of furnishing complete returns from all the presses and mills in India. The figures for the States of Hyderabad, Central India, Rajputana, and Mysore are, as will be seen from the footnotes to the tables, incomplete and have been excluded for the purpose of comparison.

* The final estimate is, however, 4,204,000 bales. (Net exports 1,410,000 bales, mill consumption 2,044,000 bales, and extra-mill consumption 750,000 bales.) The estimate of mill consumption is based on returns furnished by mills to the Cotton Growers' Association, Bombay. The previous method of calculating mill consumption from the returns of yarn, produced by mills, and furnished under the Cotton Excise Duties Act, has been discarded in favour of the

It is published in conformity with the procedure laid down in Custom^{*} Circular No. V of 1911, in order to enable merchants to compute the probable rate of duty for the year 1920:—

APPENDIX No. 1A. (page 1235.)

Open General Licence for Export of List "C" Goods to Norway, Sweden, Denmark, Holland and Switzerland.

An Open General Licence has been issued allowing goods on Section "C" of the Prohibited List, including goods on Sections "A" or "B" which have been transferred to Section "C" by open general licences (Appendix No. 1, page 1234), but not including any good contained in Section "D" (page 1233), to be exported freely by freight from this country to Norway, Sweden, Denmark, Holland and Switzerland, on the following terms :—

NORWAY AND SWEDEN.—Individual guarantees in respect of exports are no longer required, but the goods must be consigned to the appropriate Import Associations. In order that the method of consignment may be checked, an arrangement has been made whereby shippers are to forward the Customs Shipping Bills or Specifications (whichever are required under Customs regulations) to the Export Licence Department, 4, Central Buildings, Westminster, S. W. 1 (in envelopes marked "Shipping Section") for approval. Should the exporter actually have received a guarantee against re-export in respect of the transaction, it should be forwarded with the Shipping Bill or Specification, and if the guarantee has previously been sent to this Department, the reference number of the relative papers should be furnished. The Shipping Bills or Specifications will be amended, if necessary, and returned to the shippers stamped "approved." Upon the production of approved Shipping Bills or Specifications, shipment will be allowed by H. M. Customs without any form of guarantee subject to the usual Customs formalities. This procedure will not apply to any individual licences which have already been issued, or which may hereafter be issued in special cases.

Should exporters prefer, they may forward to this Department a duplicate of the usual advice sent to their shipping agents in lieu of a Shipping Bill or Specification. The advice will then be stamped and returned to them (or to their shipping agents if requested) for production to the Customs with the usual Shipping Bill or Specification. Documents addressed to the Shipping Branch of the Export Licence Department will be dealt with at once and will be despatched to exporters by return post.

DENMARK.—The usual certificates from the Danish Associations must be produced to the Customs at the time of shipment. Where goods covered by one certificate are to be shipped in instalments, special arrangements should be made with the Customs on shipment of the first instalment. The certificates need not be produced to the Customs in any case where individual licences have been or may be issued by this Department in special cases.

HOLLAND.—All goods may be consigned to the Netherland Oversea Trust for account of sub-consignees without the prior production of an N.O.T. certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

SWITZERLAND.—All consignable goods may be consigned to the Société Suisse de Surveillance Economique for account of the sub-consignee without prior production of any form of certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. A list of consignable goods is given in the "Board of Trade Journal" of the 8th May (the list will be printed in the next issue of the List of Export Prohibited Goods). The same procedure will apply to outstanding licences.

In cases where the Associations specified above refuse generally or specifically to accept consignment and exporters make a declaration to the Customs to this effect, the goods may be consigned to the Inter-Allied Trade Committees in Christiania, Stockholm, Copenhagen or The Hague, as the case may be, on account of the sub-consignee without the prior production of any document. In the case of Switzerland, consignment of such goods should be made to the British Legation at Berne. Non-consignable goods, not on the "free" list, should also be consigned to the British Legation at Berne.

The local Inter-Allied Trade Committees (or the British Legation, as the case may be) will endorse the Bills of Lading (without any financial liability) on receipt of satisfactory guarantees from the importer.

Further information will be given as soon as it is known which of the above-mentioned Associations are prepared to accept consignment. Mean time consignors should get into touch with consignees in respect of goods which will be ready for shipment in the next few weeks, with a view to ascertaining whether the appropriate Association will accept consignment or not.

Applications for licences should continue to be made to the Export Licence Department (4, Central Buildings, Westminster, S.W. 1) for all goods on Sections "A," "B" or "D" of the Prohibited List. Application should also be made for the following goods on Section "C":—

- (a) goods to be despatched by parcel post ;
- (b) goods intended for the personal use of the recipient ;
- (c) isolated trade transactions not exceeding £5 in value.

In each case [except as regards (b) and (c) above for which guarantees are usually waived] exporters should state whether the appropriate Importing Association is willing to accept consignment of the goods; and if the Association has refused to accept consignment, generally or specifically, that fact should be stated.

APPENDIX No. 2 (page 1237).

TRANSHIPMENT OF GOODS IN THE UNITED KINGDOM.

The Board of Trade (Export Licence Department) announced that goods of any description (other than foodstuffs from Europe destined for extra-European destinations) may be brought to this country for transhipment to any destination to which exports are ordinarily allowed, provided that in the case of any goods on Sections "A" or "B" of the list of prohibited exports the Bills of Lading clearly shew that the goods were intended for transhipment before they left the country of origin, or that other satisfactory evidence to that effect is produced to the Export Licence Department. If these conditions are observed, it will, therefore, in future be unnecessary to obtain the provisional approval of that department before bringing goods to this country for transhipment. In the case of goods destined for the border neutral countries in Europe, the goods must be consigned to the approved Import Associations in accordance with the regulations for the time being in force in respect of direct exports from the United Kingdom.

Applications for transhipment permits should in all cases still be made on the form S.90 to the Customs authorities at the port of arrival; and as regards any goods on Sections "A" or "B" of the list of prohibited exports, the Bills of Lading, if available, should accompany the S.90 form.

APPENDIX No. 1A

OPEN GENERAL LICENCE FOR EXPORT OF LIST C GOODS TO NORWAY, SWEDEN, DENMARK, HOLLAND AND SWITZERLAND.

An Open General Licence has been issued allowing goods on Section C of the Prohibited List, including those shown in Appendix No. 1 (page 1234), but not including any goods contained in Section D (page 1233), to be exported freely **by freight** from this country to Norway, Sweden, Denmark, Holland and Switzerland, on the following terms:—

NORWAY AND SWEDEN—Individual guarantees in respect of exports are no longer required, but the goods must be consigned to the appropriate Import Associations. In order that the method of consignment may be checked, an arrangement has been made whereby shippers are to forward the Customs Shipping Bills or Specifications (whichever are required under Customs regulations) to the Export Licence Department, 4, Central Buildings, Westminster, S.W. 1 in envelopes marked "Shipping Section" for approval. Should the exporter actually have received a guarantee against re-export in respect of the transaction, it should be forwarded with the Shipping Bill or specification, and if the guarantee has previously been sent to this Department, the reference number of the relative papers should be furnished. The Shipping Bills or Specifications will be amended, if necessary, and returned to the shippers stamped "approved." Upon the production of approved Shipping Bills or Specifications, shipment will be allowed by H.M. Customs without any form of guarantee, subject to the usual Customs formalities. This procedure will not apply to any individual licences which have already been issued, or which may hereafter be issued in special cases.

Should exporters prefer, they may forward to this Department a duplicate of the usual advice sent to their shipping agents in lieu of a Shipping Bill or Specification. The advice will then be stamped and returned to them or to their shipping agents if requested for production to the Customs with the usual Shipping Bill or Specification. Documents addressed to the Shipping Branch of the Export Licence Department will be dealt with at once and will be despatched to exporters by return post.

DENMARK.—The usual certificates from the Danish Associations must be produced to the Customs at the time of shipment. Where goods covered by one certificate are to be shipped in instalments, special arrangements should be made with the Customs at the time of shipment. The certificates need not be produced to the Customs in any case where individual licences have been or may be issued by the Export Licence Department in special cases.

HOLLAND—All goods may be consigned to the Netherlands Oversea Trust for account of the sub-consignee without the prior production of an N.O.T. certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences.

SWITZERLAND.—All consignable goods may be consigned to the Société Suisse de Surveillance Economique for account of sub-consignee without prior production of any form of certificate, though exporters who actually hold certificates should hand them to the Customs at the time of shipment. The same procedure will apply to outstanding licences. A list of consignable goods is issued as a supplement to the List of Export Prohibited Goods.

In cases where the Associations specified above refuse generally or specifically to accept consignment and exporters make a declaration to the Customs to this effect, the goods may be consigned to the Inter-Allied Trade Committees in Christiania, Stockholm, Copenhagen or The Hague, as the case may be, on account of the sub-consignee without the prior production of any document. In the case of Switzerland, consignment of such goods should be made to the British Legation at Berne. Non-consignable goods, not on the "free" list, should also be consigned to the British Legation at Berne.

The local Inter-Allied Trade Committees (or the British Legation, as the case may be) will endorse the Bills of Lading (without any financial liability) on receipt of satisfactory guarantees from the importer.

Further information will be given as soon as it is known which of the above-mentioned organisations are prepared to accept consignment. Meantime consignors should get into touch with consignees in respect of goods which will be ready for shipment in the next few weeks.

with a view to ascertaining whether the appropriate Association will accept consignment or not.

Applications for licences should continue to be made to the Export Licence Department (4, Central Buildings, Westminster, S.W. 1) for all goods on Sections A, B or D of the Prohibited List. Applications should also be made for the following goods on Section C :—

- (a) goods to be despatched by parcel post ;
- (b) goods intended for the personal use of the recipient ;
- (c) isolated trade transactions not exceeding £5 in value.

In each case (except as regards (b) and (c) above, for which guarantees are usually waived) exporters should state whether the appropriate Importing Association is willing to accept consignment of the goods ; and if the Association has refused to accept consignment, generally or specifically, that fact should be stated.

APPENDIX No. 1B.

Export of Small Consignments by Parcel Post to Neutral Countries in Europe.

Exports by parcel post to neutral countries in Europe are allowed without consignment to the usual Importing Associations, or, in the case of Denmark, guarantees against re-export, provided the value of the parcel does not exceed £5. It should, however, be distinctly understood that this procedure is intended to apply to isolated transactions only, and that exporters cannot be allowed to despatch large numbers of parcels to the same consignee without consignment to the appropriate Import Associations ; it will not, however, be necessary for certificates from these Associations to be produced.

Goods for Private Consignees.

Applications to export goods in reasonable quantities to private consignees in Norway, Sweden, Denmark, Holland, and Finland without consignment to the usual Importing Associations or production of guarantees against re-export.

It must be understood that no goods can be despatched under this scheme except such as are for the personal use of the consignee and of his family.

APPENDIX No. 1C.

Consignment to Importing Associations, &c. (or, in the case of Denmark, Guarantees against Re-Export) are not required for the following Export Prohibited Goods :—

Foodstuffs.

Foodstuffs (including raw materials for the manufacture of foodstuffs) may now be exported to Norway, Sweden, Denmark and Holland without the intervention of official consignees. Licences for foodstuffs on List A and B will, therefore, where home supplies permit, be issued providing for consignment direct to the purchaser.

As regards foodstuffs on List C, an open general licence has been issued permitting export to be made direct to the consignee without the production of individual guarantees against re-export. Shipping bills (or specifications) in respect of such goods need, therefore, no longer be produced to the Export Licence Department to be stamped "approved" before production to H. M. Customs.

The term "foodstuffs" should be regarded as including spices and beverages.

Samples exported under this licence may be used only for genuine sample purposes, i.e., for obtaining orders from foreign buyers, and may not be sold except with the written consent of the Export Licence Department, but such consent may be dispensed with when it is desired to sell the articles in the country of destination after they have fulfilled their purpose as samples. Exporters will be required to satisfy the Customs Authorities that the goods presented for export under this licence are *bona-fide* samples, and to make a declaration to that effect on the relative shipping documents.

APPENDIX No. 4.

Open General Licence for Export of Cartridges, Charges, &c., to certain Destinations.

An Open General Licence has been issued for the export of cartridges, charges, &c., and industrial explosives to the destinations given below, to which, therefore, exports may be made

subject to the usual Customs formalities without applications for specific licences to the Export Licence Department:—

The issue of this licence does not relieve exporters from the necessity of obtaining import permits from the country of destination in cases where local regulations render such a course necessary.

URGENT ORDERS.

The Board of Trade, Export Licence Department, announces that, in collaboration with the Department of Overseas Trade, an arrangement has been made whereby firms receiving orders which require immediate acceptance may telegraph details of any such order to the Department of Overseas Trade in order to ascertain whether a licence will be granted for the export of the goods if the order is accepted.

In the event of an applicant being promised a licence he will be enabled to deal with the order straightaway with the knowledge that upon application being made in the proper form to the Export Licence Department the licence will be granted.

The telegrams should be addressed to "Orders, c/o Advantage, Stock, London." They should give in each case in addition to the name and postal or telegraphic address of the applicant the quantity and description of the goods comprised in the order and the name and address of the ultimate consignee if the goods are destined for a neutral country. In the case of orders from Allied or British Territory or from Territory in the occupation of troops of the Associated Governments, the consignee need not be stated; and it will be sufficient merely to give the country of destination. A reply of 24 words (1-3) must be prepaid.

Applicants are requested in their own interest to confine their enquiries to orders needing a very urgent decision; since the fewer the enquiries the more promptly can answers be given.

Any subsequent correspondence that is necessary in connection with the telegraphic enquiries should be addressed to the Comptroller General, Department of Overseas Trade (Export Facilities Section), 73, Basinghall Street, E.C. 3.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 19th June 1919, based on the Indian Daily Weather Reports of the period.

1. The depression over Ranchi referred to in the summary for the previous week continued over Chota Nagpur on the 12th and the activity of the Arabian Sea current was therefore restricted chiefly to the Central Provinces on that day. During the next two days the depression moved westwards to Central India West and with its advance rainfall extended to Gujarat, Central India West and south Rajputana and increased in the Konkan. During the rest of the week the Arabian Sea current was unsteady. It was very weak on the 15th, but revived on the 16th and 17th in the Central Provinces and Central India East; on the 18th it declined again in the central parts of the country and strengthened slightly in Malabar. The Bay current was on the whole less strong than usual in northeast India. There were occasional extensions of rainfall into the United Provinces during the week.

Season and Crop Prospects for the week ending Saturday,
14th June 1919.

Burma.—Good rain fell during the week in Lower Burma and heavy rain on the Arakan and Tenasserim coasts in Upper Burma except in the wet zone where the rainfall was scanty. Ploughing of winter rice is becoming general throughout Lower Burma. In Upper Burma ploughing of uplands and cultivation of early sesamum, cotton and groundnuts are proceeding. Harvesting of spring crops has been nearly completed. Standing crops are generally good. Cattle, on the whole, are healthy. The price of unhusked rice is stationary in Rangoon and is much above normal. The market for white rice is steady at rupees 352-8-0 per hundred baskets for specials.

Assam.—The weather during the week was generally seasonable. More rain is wanted in three districts. Sowing of autumn rice and jute is practically finished. Planting of sugarcane is almost finished. Plucking of tea and ploughing for and sowing of white rice continue. Prospects of crops are fair. Cattle disease is reported from five districts. The price of common rice continues to rise slowly in the Assam Valley but is falling slightly in the Burma Valley.

Bengal.—During the week moderate to heavy rain was general. Standing crops which suffered previously from lack of soil moisture have been greatly benefited by recent rainfall. Preparation of tillage for winter paddy is progressing briskly. The average price of common rice has risen by 1-5 per cent. Distress is apprehended in parts of Murshidabad. Scarcity is reported from Leohomong Circle of the Chittagong Hill Tracts. The average number of persons engaged daily on test works in Brahmanbaria was 2,650.

The weekly report on famine in Bankura for week ending 14th June is as follows:— The rainfall during the week was general. Ploughing and sowing of paddy are in progress. Fifty-four works are open. The decrease in numbers on works is due to agricultural operations. The increase in numbers on gratuitous relief is due to the opening of new centres. Fodder and water are sufficient. Cloth is being distributed to destitutes. Loans are freely advanced. Relief measures are adequate. The price of common rice varies from 5 to 5½ seers per rupee.

Season and Crop Prospects for the week ending Saturday,
21st June 1919.

Burma.—During the week the rainfall was heavy on Arakan and Tenasserim coasts, elsewhere in Lower Burma the fall was moderate. In the dry zone of Upper Burma it was scanty and in the wet zone good. Ploughing for winter rice is progressing throughout Lower Burma. Sowing has commenced in a few districts in Upper Burma. Cultivation of sesamum, groundnuts, cotton and of other autumn crops is proceeding. Reaping of spring crops has been practically completed. Standing crops are in good condition. Cattle are generally healthy. The price of unhusked rice at Rangoon is unchanged and much above normal. The market for white rice is steady at rupees 382-8-0 per hundred baskets for specials.

Assam.—The weather during the week was generally seasonable but more rain is wanted in four districts. Ploughing for and sowing of winter rice and plucking of tea continue. Transplanting of winter rice has commenced. Prospects of crops are generally fair. Cattle disease is reported from five districts. The price of common rice still shows a slight tendency to rise.

Bengal.—During the week moderate to general rain which fell throughout the Province has improved further prospects of standing crops. Harvesting of jute and autumn paddy has begun in the low lying tracts of some eastern districts. Preparation of lands for next winter rice is progressing favourably. Transplanting also has commenced in places. The average price of common rice has risen about 2·2 per cent. Continuance of scarcity is reported from Lohomong Circle of the Chittagong Hill Tracts. The average number of persons engaged on test works in the Brahmanbaria Sub-division is 2,602.

The weekly report on famine in Banara for week ending 21st June 1919 is as follows:—The rainfall during the week was general. Transplantation of early paddy has begun. Ploughing and sowing are progressing. Sixty works are open. Cash doles are being given in 108 unions. Numbers relieved on works 7,874. Gratuitous relief by cash doles 14,453, paddy husking advances 3,196, weavers 746, better class poor 523, total 18,918, grand total 26,792. The increase in numbers on works and gratuitous relief is due to the taking up of new areas and the opening of new centres. Four charitable societies relieved 1,924 persons by rice doles. The physical condition of works and the public health are good. Fodder and water are sufficient. Cloth is being distributed to destitutes. Relief measures are adequate. The price of common rice varies from 5 to 24 seers per rupee.

Bihaar and Orissa.—During the week rain was general over the Province. The fall was heavy in parts of Chota Nagpur, and also in Champaran, Sambalpur and Purnea and light to moderate in the remaining districts. Sowing of autumn crops is in progress. Standing crops are doing well. Some damage has been done by floods to *marua* and paddy in Puri. In the month of April, 1919, the excess of exports over imports of private merchandise was Rs 8.15 lakhs, as against Rs 4.49 lakhs in April, 1918 and Rs 7.26 lakhs in April, 1917. As the publication of treasure figures has been temporarily discontinued, it is not possible to give here the net (private) exports in April, nor the net balance of trade in the same month. It may, however, be of interest to note that the net (private) exports in April, 1919, were considerably above those of 1918 and were also higher than those of 1917. The balance of trade, so far as shown by the statistics of merchandise, treasure, Council Bills, and Enfaced Rupee paper in the month of April, 1919, was in favour of India, and this was to much greater extent than in 1918 and 1917.

No Council Bills and Telegraphic Transfers were paid in India in the month of April 1919, but Reverse Council Bills were sold to the extent of Rs 20 lakhs during the month. In the month of April, 1918, the amount

of Council Bills and Telegraphic Transfers paid in India was Rs4,35.2 lakhs, the whole amount being paid through the Paper Currency Reserve. In the month of April, 1917, the amount paid was Rs5,25.4 lakhs, of which about Rs43 lakhs were paid through the Gold Standard Reserve, over Rs2,29 lakhs through the Paper Currency Reserve and over Rs2,53 lakhs through the Treasuries. As regards Enfaced Rupee paper Rs30,225 represented the amount of paper enfaced to London and Rs80,000 the amount re-transferred from London in the month of April, 1919, while in the corresponding month of 1918, Rs2,000 represented the amount of paper enfaced to London but no amount was re-transferred from London.

CALCUTTA, MAY 30, 1919.

Third WHEAT Forecast, 1918-19.

This forecast is based on reports received from local authorities, and refers to 98·6 per cent of the total area under wheat in India. The returns, therefore, cover practically all the important wheat growing areas of India. The final memorandum on the wheat crop will issue, as usual, in the second week of August.

The total area is estimated at 23,566,000 acres, as against 35,857,000 acres,* the corresponding estimate of last year, or a decrease of 33 per cent. The total yield is estimated at 7,407,000 tons, as against 10,181,000 tons,* estimated at this time last year, or a decrease of 27 per cent. This estimate falls short of the final revised figure (9,922,000 tons) of last year by 25 per cent.

General condition of the crop.—The crop has on the whole been good in the important wheat growing areas, except in Bombay and Hyderabad. As stated in the Special Forecast in April the decrease in the estimate of total yield is due to smaller areas having been sown owing to the unfavourable character of the season and the prevalence of influenza at sowing time. On the other hand, it will be seen from statement (2) below that the estimated yield per acre, especially in the three important wheat growing provinces, namely, the Punjab, the United Provinces, and the Central Provinces and Berar, is larger as compared with the corresponding estimate of last year.

The present estimate of yield, as against that made at this time last year shows a decrease of 68 per cent in Bombay, 67 per cent in Hyderabad, 52 per cent in Rajputana, 47 per cent in Sind, 33 per cent in Central India, 27 per cent in Bihar and Orissa, 25 per cent in the North-West Frontier Province, 23 per cent in the Punjab, 20 per cent in the United Provinces, and 16 per cent in the Central Provinces and Berar.

The detailed figures are as follows :—

The provincial reports are summarised below :—

Punjab (32·7 per cent of the total area under wheat in India).—The total area is estimated at 8,388,000 acres (841,000 acres being in the Indian States), which is 26 per cent below the estimate made at this time last year. The total yield is estimated at 2,835,000 tons (276,000 tons being in the Indian States), which is 23 per cent less than the corresponding estimate of last year. The total rainfall received up to the end of March was insufficient for the maturing of the unirrigated crop, especially in the south-east. Some rain accompanied in places by hail and high winds was received in April and the first week of May, but did no appreciable damage to the standing crop. The water supply in canals was short. The yield is reported to be normal or above normal on irrigated lands, and generally below normal on unirrigated lands. The crop this year is generally free from diseases, rust or smut, and the quality of the grain is good.

United Provinces (22 per cent of the total area under wheat in India).—The total area under wheat pure and mixed is estimated at 5,461,000 acres, which is 24 per cent less than that estimated at this time last year. The total yield is estimated at 2,304,000 tons, as compared with 2,882,000 tons estimated at this time last year, or a decrease of 20 per cent. There were scattered showers in April in most districts, but they were not heavy enough to interfere with threshing and winnowing operations, which have been carried on under favourable weather conditions, and are now nearing completion. For the province as a whole the crop is estimated at 85 per cent of the normal.

Central Provinces and Berar (11·6 per cent of the total area under wheat in India).—The total area is estimated at 2,880,000 acres (99,000 acres being in the Khairagarh and Nandgaon States), which is 28 per cent below the corresponding estimate of last

* Revised figure.

year. The total yield is estimated at 677,000 tons (14,000 tons being in the two States mentioned above), which is 16 per cent less than the estimate made at this time last year. Since the issue of the Special Forecast in April light to moderate showers of rain accompanied by hail were received in that month in parts of a few districts, but caused no damage to the crop on the threshing floor.

Bombay (6·8 per cent of the total area under wheat in India).—The total area is estimated at 1,001,000 acres (59,000 acres being in Baroda and 243,000 acres in the other Indian States), which is 61 per cent below the estimate made at this time last year. The total yield is estimated at 209,000 tons (14,000 tons being in Baroda and 65,000 tons in the other Indian States), which is 63 per cent less than the corresponding estimate of last year. The crop is nowhere reported to have been affected by disease or rust. The irrigated crop suffered in places to some extent from deficiency of water supply, but on the whole gave a fair yield. The unirrigated crop in Gujarat and Deccan entirely withered away in places, and elsewhere yielded an indifferent outturn. In the Karnatak the crop suffered from insufficiency of moisture, particularly in Bijapur and eastern parts of Belgaum, where it yielded poorly; elsewhere it did fairly well.

Sind (1·9 per cent of the total area under wheat in India).—The total area is estimated at 336,000 acres (15,000 acres being in the Khairpur State) which is 50 per cent short of last year's corresponding estimate. The total yield is estimated at 96,000 tons (4,000 tons being in the Khairpur State), which is 47 per cent below the estimate made at this time last year. The crop suffered at first from deficiency of water supply, but favourable North winds later on improved it so as to secure a fairly good yield.

Bihar and Orissa (4·1 per cent of the total area under wheat in India).—The total area is estimated at 979,000 acres, which is 18 per cent less than the estimate made at this time last year. The total yield is estimated at 363,000 tons, which is 27 per cent smaller than the corresponding estimate of last year. Sowings were restricted owing to the absence of rain. The crop was also affected by drought in the early part of the season. The rain-fall in January was, however, of great benefit to the standing crop and improved its prospects considerably. The average outturn for the province is expected to approximate to 85 per cent of the normal.

North-West Frontier Province (3·2 per cent of the total area under wheat in India).—The total area is estimated at 856,000 acres, which is 27 per cent less than that estimated at this time last year. The total yield is estimated at 225,000 tons, which is 25 per cent below the corresponding estimate of last year. The yield was generally average on irrigated lands except in Dera Ismail Khan, while on unirrigated lands it was poor.

Bengal (0·4 per cent of the total area under wheat in India).—The area is estimated at 114,000 acres, which is 8 per cent below the corresponding estimate of last year. The total yield is estimated

at 22,000 tons, which is 33 per cent less than that estimated at this time last year. The crop was adversely affected by drought.

Delhi (0·1 per cent of the total area under wheat in India).—The area and yield are estimated at 23,000 acres and 12,000 tons, as against 42,000 acres and 12,000 tons, estimated at this time last year.

Ajmer-Merwara (0·05 per cent of the total area under wheat in India).—The area and yield are estimated at 6,000 acres and 2,000 tons, as compared with 22,000 acres and 10,000 tons, the corresponding estimates of last year.

Central India (9·9 per cent of the total area under wheat in India).—The total area is now estimated at 2,292,000 acres, which is 47 per cent below the corresponding estimate of last year. The total yield is estimated at 488,000 tons, which is 33 per cent less than that estimated at this time last year. Detailed figures are as follows:—

Wheat in Foreign Countries.—From the latest information published by the International Institute of Agriculture, Rome, it appears that the estimates of the Argentine crop for 1918-19 are 16,968,000 acres and 4,925,000 tons, which are 5 per cent and 18 per cent respectively below the final estimates for 1917-18. The estimates for Australia are 8,645,000 acres and 2,161,000 tons, which are 11 per cent and 30 per cent below the final figures of 1917-18. In the United Kingdom winter sowings were delayed by wet weather and the area sown is stated to be smaller than that of last year. The estimates of the area sown with the 1918-19 crop in the principal countries in the Northern Hemisphere are shown below:—

	1918-19	1917-18
	Acres	Acres
United States of America	49,007,000	42,283,000
France	11,082,000	11,355,000
Italy	10,497,000	10,794,000
Canada	840,000	885,000

From unofficial sources it appears that in the United States of America there are complaints of "Hessian fly" in winter wheat, but generally the outlook for this crop remains extremely promising. It is reported that owing to unseasonable weather sowing of the spring wheat crop has been delayed in the North-West, and that the area will show a decrease of probably 20 per cent or 3,000,000 acres. In Canada sowing is general in the great western region and the crop outlook is the best for twelve years. In Ontario spring sowing has been delayed by frequent rain, but the winter wheat promises a record crop. In Italy the new wheat crop continues to be promising. In the United Kingdom farmers have been able to make fairly good progress with the sowing of spring cereals, but some fields intended for barley and oats have still to be drilled, and it is reported that the sowing of spring wheat has done nothing towards making good the reduction in the winter wheat acreage.

INTRODUCTORY NOTE.

These figures are compiled in the Department of Statistics, India, from accounts rendered by millowners under the terms of the Cotton Duties Act, II of 1896. The returns are furnished by the Collector of Customs, Calcutta, the Collector of Bombay, the Boards of Revenue, Madras and the United Provinces, the Director of Industries, Punjab, the Chief Customs Authority in the Central Provinces and Berar, the Deputy Commissioner of Delhi, the Commissioner of Ajmer-Merwara, the Political Officers in Indian States, and the French Government at Pondicherry.

The result of the spinning and weaving in cotton mills in March, 1919, may be briefly summarised as follows (in thousands of pounds) :—

	March 1919	February 1919	March 1918	INCREASE (+) OR DECREASE (—) IN MARCH 1919 AS COMPARED WITH.	
				Previous month.	Corresponding month of preceding year.
				Per cent.	Per cent.
Yarn spun	56,182	50,152	48,749	+12	+15
Woven goods manufactured	27,805	28,342	23,848	—2	+19

The total quantity of yarn spun during the month under review amounted to 56 million lbs. and that of woven goods to 28 million lbs. as compared with 49 million and 23 million lbs. respectively in the corresponding month of the preceding year, or an increase of 15 per cent in the case of yarn, and 19 per cent. in the case of woven goods.

In the seven months September 1918 to March, 1919, i.e., from the beginning of the cotton year 1918-19, the quantity of yarn spun amounted to 344 million lbs. and that of woven goods to 187 million lbs. as against 372 million and 213 million lbs. respectively, in the corresponding months of the preceding year.

Twelve months' spinning and weaving Results.

In the twelve months, April 1918, to March 1919, the quantities produced were 615 million lbs. of yarn and 350 million lbs. of woven goods. These figures are compared in the statement below with those for the two preceding years :—

	TWELVE MONTHS, APRIL TO MARCH			Increase (+) or Decrease (—) in 1918-19 as compared with 1917-18.
	1918-19	1917-18	1916-17	
	1000 lbs	1000 lbs	1000 lbs	1000 lbs
Yarn spun	615,040	660,576	681,107	—45,536
Woven goods manufactured	349,560	381,404	377,729	—31,824

There was thus a decrease in the production of both yarn and woven goods in Indian mills in 1918-19, as compared with 1916-17 and 1917-18.

The exports of cotton twist and yarn in the twelve months, April, 1918, to March, 1919, were only 64 million lbs. as compared with 122 and 169 million lbs in the preceding two years.

The quantity of coarse, medium, and fine yarns produced in Indian mills is compared below with the quantity imported by sea from foreign countries during March and the twelve months, April to March 1917-18 and 1918-19. The production of coarse yarn (Nos. 1 to 25) in the month of March was 50 million lbs. and the imports of the same counts were 126,000 lbs. only; the production of medium counts (Nos. 26 to 40) was 5.4 million lbs. and of fine counts (above No. 40) 295,000 lbs. as against 528,000 lbs and 360,000 lbs. respectively, of imported yarn of the same counts, as will be seen from the table below (in thousands of lbs.). It is noticeable that imports increased while the production decreased in the twelve months April to March, 1918-19.

G. FINDLAY SHIRBÁS,

Director of Statistics

DEPARTMENT OF STATISTICS, INDIA,
1, COUNCIL HOUSE STREET, CALCUTTA,

The 12th June 1919

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, JUNE 5, 1919.

Final General Memorandum on the WINTER OILSEEDS (Rape, Mustard, and Linseed) Crop of 1918-19.

This forecast is based upon reports received from provinces where rape, mustard, and linseed are grown to any considerable extent. These provinces contain 98.6 per cent of the total area under rape and mustard and 98.9 per cent of the total linseed area in British India. Of the Indian States, estimates are furnished only by Hyderabad and the States in the Bombay Presidency (including Baroda).

The season, on the whole, was not favourable for the oilseeds crop. The prolonged drought, which prevailed from October to December, not only restricted the area sown but also adversely affected the growth of the crop almost everywhere.

The total area under rape and mustard is reported to be 4,833,000 acres, which is 32 per cent below the finally revised area of last year. The total estimated yield is 758,000 tons, as against 1,153,000 tons, the revised final figure of last year, or a decrease of 34 per cent. The detailed figures for the provinces are given below —

The provincial reports are summarised below :—

RAPE AND MUSTARD

United Provinces (39.7 per cent of the total area under rape and mustard in British India).—The area sown with the unmixed crop is reported to be 92,000 acres, which is 38 per cent below the area of last year. The decrease is attributed to unfavourable conditions at sowing time. The yield is estimated at 14,000 tons, which is 33 per cent below last year's yield. The area and yield of rape-seed grown mixed with other crops, as borders and lines, and used chiefly for home consumption, are roughly estimated at 1,448,000 acres and 263,000 tons, as against 2,515,000 acres and 405,000 tons last year. The crop on unirrigated land suffered from drought in the early part of the season, and later on was attacked by insects. The outturn for the provinces as a whole is estimated at 60 per cent of the normal.

Bengal (30·3 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 1,135,000 acres, which is 2 per cent below last year's area. The yield is estimated at 169,000 tons, which is 20 per cent less than the yield of last year. The season was unfavourable at sowing time and for the subsequent growth of the crop, owing to continued drought from October to December. The rainfall of January and February came too late to materially affect the outturn.

Punjab (16 per cent of the total area under rape and mustard in British India).—The total area is now estimated at 658,000 acres, which is 48 per cent less than last year's area. The yield is estimated at 113,000 tons, which is 42 per cent below the yield of last year. The season was very unfavourable for sowings owing to deficient rainfall and shortage of canal water. The winter rains were also insufficient for the maturing of the unirrigated crop, specially in the south-east and parts of the west where such crop is important. *Toria* (an early variety of rapeseed), which is almost entirely grown on irrigated area, did better than other oilseeds.

Bihar and Orissa (11·5 per cent of the total area under rape and mustard in British India).—The total area sown is reported to be 683,000 acres, which is 15 per cent less than that of last year. The decrease is attributed to the failure of late rains. The yield is estimated at 113,000 tons, which is 39 per cent below the yield of last year. The rainfall in January was too late to materially improve the early crop. The season on the whole was decidedly unfavourable owing to drought in the early part of the season.

Assam (4·8 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 269,000 acres, which is 2 per cent above last year's area. The yield is estimated at 46,000 tons, which is also 2 per cent more than the yield of last year. The weather continued dry since the issue of the first forecast, and the growth of the crop was much affected.

Sind (4·1 per cent of the total area under rape and mustard in British India).—The area sown is reported to be 83,000 acres (6,000 acres being in the Khairpur State), which is 82 per cent below that of last year. Low inundation and absence of rain greatly restricted the area. The yield is estimated at 8,000 tons (1,000 tons in the Khairpur State), as against 53,000 tons last year. The crop is expected to be good in Nawabshah and Khairpur and fair elsewhere.

North-West Frontier Province (1·9 per cent of the total area under rape and mustard in British India).—The area sown is estimated at 51,000 acres, which is 63 per cent less than last year's area. The yield is estimated at 9,000 tons, which is 47 per cent below that of last year. Climatic conditions were not favourable for the crop.

Bombay (0·1 per cent of the total area under rape and mustard in British India).—The total area

reported is 19,000 acres (17,000 acres being in the Indian States), which is 74 per cent below that of last year. Cultivation of the crop was greatly restricted owing to want of moisture. The total yield is estimated at 3,000 tons, which is 64 per cent below last year's yield. The crop suffered through drought. The outturn is expected to be about two-thirds of the normal in Baroda and one-third elsewhere.

Hyderabad reports 5,000 acres and 300 tons, against 8,000 acres and 200 tons last year.

LINSEED

Central Provinces and Berar (37·1 per cent of the total area under linseed in British India).—The total area sown is reported to be 516,000 acres (26,000 acres being in Berar), which is 59 per cent below last year's area. The large contraction in area is principally attributed to adverse climatic conditions at sowing time. The yield is estimated at 15,000 tons (1,000 tons being in Berar), which is nearly 84 per cent less than last year's yield. The season was not favourable for the crop. Germination was defective, and the young seedlings were unable to survive the severe and prolonged drought that prevailed from the middle of September to December. The rain that fell from January to April, occasionally accompanied by hail in several districts, caused further appreciable damage to the crop. For the provinces, as a whole, the average outturn is estimated at only 35 per cent of the normal.

United Provinces (28·9 per cent of the total area under linseed in British India).—The total area under linseed sown unmixed is reported to be 69,000 acres, which is 81 per cent below the area of last year. The decline in area is due to very unfavourable conditions at sowing time. The yield is estimated at 13,000 tons, which is 78 per cent less than last year's yield. The area and yield of linseed grown mixed with other crops and used chiefly for home consumption, are roughly estimated at 321,000 acres and 59,000 tons, as against 695,000 acres and 117,000 tons last year. The unirrigated crop suffered from drought in the early part of the season. For the provinces, as a whole, the outturn is estimated at 80 per cent of the normal.

Bihar and Orissa (21·1 per cent of the total area under linseed in British India).—The total area is reported to be 595,000 acres, which is 19 per cent below last year's area. The decrease in area is attributed to the failure of late rains. The yield is estimated at 95,000 tons, which is 42 per cent less than that of last year. The season was unfavourable owing to drought in the early part of the season.

Bengal (5·8 per cent of the total area under linseed in British India).—The total area sown is reported to be 144,000 acres, being the same as last year's area. The yield is estimated at 15,000 tons, which is 82 per cent below the yield of last year. The season was unfavourable owing to continued drought from October to December.

Bombay (4.8 per cent of the total area under linseed in British India).—The total area sown is reported to be 80,000 acres (7,000 acres being in the Indian States), which is 85 per cent below that of last year. The total yield is estimated at 5,000 tons, which is 88 per cent less than last year's yield. Owing to the total absence of late rains the crop was sown only in places where there was any moisture available and in anticipation of rain later on. This failed and the crop withered away in many places. The surviving crop yielded between 15 to 30 per cent of normal in the Deccan and between 30 to 65 per cent in the Kanatak.

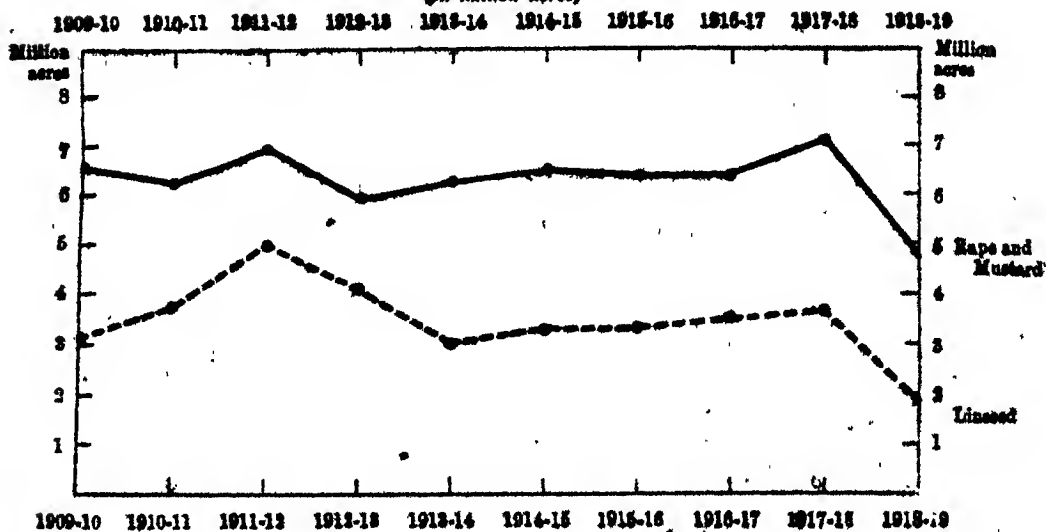

Punjab (1.2 per cent of the total area under linseed in British India).—The total area sown is reported to be 81,000 acres, which is 30 per cent below the area of last year. The yield is estimated at 2,000 tons, which is 25 per cent less than last year's yield. The season was very unfavourable at sowing time, and the winter rains were also insufficient.

Hyderabad reports 215,000 acres under linseed, which is 37 per cent less than that of last year. The total yield is estimated at 21,000 tons, which shows an increase of 10 per cent as compared with last year.

PREFATORY NOTE.

Prices of Country Produce and Salt in India at the end of May, 1919.

(a) *The last fortnight of May, 1919, as compared with the preceding fortnight.*

The wholesale prices of cereals and pulses in India at the end of May, 1919, increased by 8 per cent as compared with the previous fortnight. The price of wheat rose by 4 per cent; but there was no fluctuation in the unweighted average price of rice, the weighted average showing a rise of 3 per cent. Of the inferior grains, maize advanced by 10 per cent, barley by 4 per cent, and jawar and bajra by 1 per cent each. Gram showed a rise of 6 per cent and arhar dāl 1 per cent. There was a rise of 5 per cent in raw sugar (*gur*) and 1 per cent in ghi, while the price of salt showed a fall of 1 per cent. The marked provincial fluctuations are an increase of 11 per cent in wheat in Bengal, 13 per cent in barley in Bihar and Orissa, 34 per cent in maize in Burma and 18 per cent in Bihar and Orissa, 21 per cent in gram in Bengal and 14 per cent in the North-West Frontier Province. On the other hand, there was a noticeable fall in the price of rice in Bombay (12 per cent) and Madras (11 per cent) and in the price of salt in Bihar and Orissa (16 per cent).

(b) *The last fortnight of May, 1919, as compared with the average of the preceding three years at corresponding date.*

At the end of May, 1919, wholesale prices of food grains and pulses in India advanced by 85 per cent (unweighted average), as compared with the average of the prices which ruled at the corresponding date in the last three years. The weighted average showed a rise of 97 per cent. The price of rice rose by 61 per cent. The increases in the chief rice producing areas were : 70 per cent in Bengal, 121 per cent in Bihar and Orissa, 49 per cent in Burma, and 35 per cent in the Madras Presidency. Wheat prices increased by 63 per cent. In the principal wheat-growing provinces, the Punjab showed a rise of 58 per cent, the United Provinces 69 per cent, the Central Provinces and Berar 90 per cent, and Bihar and Orissa 99 per cent. The price of barley rose by 61 per cent (unweighted average), the weighted average showing a rise of 85 per cent. The noteworthy increase was in Bihar and Orissa (133 per cent) and the United Provinces (85 per cent). There was an advance of 119 per cent in the price of jawar and 116 per cent in that of bajra in India. Grain prices showed a rise of 95 per cent, the noticeable percentage increases being 126 in Bihar and Orissa, 121 in the United Provinces, 115 in Bengal, and 105 in the Bombay Presidency. The price of arhar dāl advanced by 89 per cent in India; it rose by 187 per cent in Delhi, 152 per cent in the Central Provinces and Berar, 138 per cent in the United Provinces, and 103 per cent in Bihar and Orissa. There was an increase of 88 per cent in the price of ghi and of 65 per cent in that of raw sugar (*gur*). The rise of 168 per cent in raw sugar (*gur*) in Sind-Baluchistan is striking. The price of salt rose by 5 per cent in India, although it declined in the Bombay Presidency (18 per cent), Bengal and the Madras Presidency (6 per cent), Delhi (5 per cent), and in Assam (2 per cent). The marked rise was in the North-West Frontier Province (55 per cent), and in Punjab (35 per cent). Prices in the United Provinces remained unchanged.

DEPARTMENT OF STATISTICS, INDIA.

TRADE FLUCTUATIONS IN SELECTED ARTICLES IN APRIL, 1919.

The object of the tables appended is to show the quantities of the principal staples of agricultural produce imported from the various provinces and Indian states, and from foreign countries into the ports of Calcutta, Bombay, and Karachi, and into the Madras ports during the month of April, 1919, as compared with the corresponding month of 1918. The statistics include sea-borne foreign and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, and the Commissioners for the Port of Calcutta.

TRADE FLUCTUATIONS IN APRIL, 1918 AND 1919.

It will be seen from Table I that the imports by rail, river, and sea in April, 1919, as against the corresponding month of 1918, show (in round numbers) an increase of—

- 106 per cent in rice (including paddy)
(148,500 tons as against 71,900 tons last year),
- 70 per cent in linseed
(22,900 tons as against 13,500 tons last year),
- 26 per cent in wheat (excluding wheat flour)
(125,100 tons as against 99,200 tons last year), and
- 11 per cent in tea
(12,613,200 lbs as against 11,403,300 lbs last year).

The imports of gram and pulse by rail, river, and sea into the ports show a fall of 60 per cent (42,800 tons as against 107,700 tons last year), due mainly to smaller exports from the Punjab, the United Provinces and Rajputana and Central India. The decrease of 34 per cent (220,300 bales as against 333,100 bales last year) in the imports of jute into Calcutta is accounted for by smaller exports from Bengal, Bihar and Orissa, and Assam. The imports of rape and mustard seed show a decrease of 14 per cent (14,400 tons as against 16,700 tons last year) owing to smaller exports mainly from Bombay and the Punjab. The fall of 11 per cent (279,500 bales as against 314,800 bales last year) in the imports of raw cotton into the ports is mainly due to smaller exports from Bombay and the Punjab and from non-British ports in India.

It will be seen from Table IV (wheat, excluding wheat flour) that during April 1918, the ports received their supplies mainly from the United Provinces (70 per cent). In April, 1919, the principal sources of the imports were foreign countries (84 per cent). Table XI shows the *exports* from India by sea of wheat (including wheat flour) during each month of the six official years, 1913-14 to 1918-19, and during April, 1919.

NOTE.—One bale of cotton or jute is equivalent to 400 lbs.
One maund is equivalent to 82½ lbs.
One maund of paddy is taken as equivalent to 36 seers of rice.

TRADE FLUCTUATIONS IN APRIL, 1919, AS COMPARED WITH THE PREVIOUS MONTH.

As compared with March, 1919, the imports in April, 1919, into the ports referred to above show (in round numbers) an increase of—

- 865 per cent in linseed
(22,900 tons as against 2,400 tons previous month), and
- 52 per cent in wheat (excluding wheat flour)
(125,100 tons as against 82,500 tons previous month),

and a decrease of—

- 26 per cent in gram and pulse
(42,800 tons as against 58,100 tons previous month),
- 26 per cent in raw cotton
(279,500 bales as against 375,300 bales previous month),
- 20 per cent in rice (including paddy)
(148,500 tons as against 185,700 tons previous month),
- 6 per cent in tea
(12,618,200 lbs as against 13,377,900 lbs previous month), and
- 3 per cent in jute
(220,300 bales as against 228,300 bales previous month).

The statistics for the month of April, 1918 and 1919, together with those for March, 1919, and April, 1919, are summarised below :—
